

# MISSION IMPOSSIBLE CIRCLE MAZE

**Step 1** Draw a smallish circle at the middle of the page, and leave an opening, like you would find in a maze. Think of a place and write it in the center. Draw or write the name of a person in this center circle. Where are they, a grocery store, a park, an amusement park? Who are you looking for, a parent, a friend, a pet?

**Step 2** Draw several circles or rings around your original circle, each time leaving an opening to connect one circle to the next.

**Step 3** On the outside of the group of circles, draw a picture of the person or people you are trying to find.

**Step 4** Think of two clues that might help them find their way out (maybe a voice, an arrow, a sign, a worker). Imagine two obstacles that might make it difficult to locate family/friends, maybe a giant ride, a lot of isles, a tiger, a locked gate, anything.

**Step 5** Inside each circle/line of your maze, write or draw details that include the obstacles that block the way and clues that help you move closer to friends/family. Be as specific as you can in naming places, people, objects, so others can imagine they are there.

\* Share your maze on instagram or with a friend and see if they can find their way from the center to the person they are looking for!
