

Translate a conversation between animals that speak Swedish and other languages!

- Step 1** Use our animal dialogue guide! You will find three different drawings that show what sounds cats, mice, and pigs make in different parts of the world.
- Step 2** First, choose names for each of the characters. Next, use the drawings of the different animal sounds to figure out which languages the characters are speaking.
- Step 3** Then with the names you chose for each language you will be able to write them in before every line they speak.
- Step 4** Lastly, fill in the blank lines with your translation of what you think each animal could be saying.
